

MOUANDZA Handy Christopher

Information Technology Student | Aspiring Software Engineer

Kigali, Rwanda | +250 XXX XXX XXX | YOUR_EMAIL@example.com | GitHub: YOUR_GITHUB | LinkedIn: YOUR_LINKEDIN

PROFESSIONAL PROFILE

Third-year Information Technology student at Adventist University of Central Africa (AUCA) with a strong interest in software engineering, web development, Java programming and database systems. Motivated to build practical applications, improve problem-solving skills and grow into a professional software engineer.

TECHNICAL SKILLS

Programming: Java, C, JavaScript, PHP **Web:** HTML5, CSS3, responsive design

Backend: Spring Boot, REST APIs, Maven **Databases:** MySQL, PostgreSQL, Oracle SQL/PLSQL, H2

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman **Concepts:** OOP, CRUD, JDBC, database design, API development

ACADEMIC PROJECTS

Campus Queue Management System — Proposed web application for managing university service queues. Students receive virtual tickets and monitor their queue position; staff manage counters and tickets.

Pharmacy Stock Management System — Database project for suppliers, medicines, stock, sales and users, including stock validation, low-stock reporting and expiry controls.

Student & Book Management APIs — CRUD-based backend project using Java/Spring Boot with database persistence, pagination and API testing.

EDUCATION

Adventist University of Central Africa (AUCA), Rwanda

Information Technology — Third Year, 2026

CAREER OBJECTIVE

To obtain an internship or junior opportunity where I can apply my programming and database knowledge, learn from experienced developers and contribute to real software projects.

ADDITIONAL INFORMATION

Student ID: 27284 Languages: English, French Open to internships, academic projects and entry-level software development opportunities.
